Use this information as a starting point when shopping for a bicycle.

ebicycles

Rider Details

Adult, male

Height (H)
5' 9"
69"
175 cm

Leg Length (I)
31½"
80 cm

Road Bike Frame

Road bikes are measured in centimeters regardless of the style, although some manufacturers may use inches.

Frame Measurement

This is the length of the seat tube, measured from the center of bottom bracket to top of the seat tube. Center to Top C-T:

54 cm
21.5"

More sizes to consider:

53cm, 54cm, 55cm, 56cm
21", 21.5", 22"

Crank Sizes

Longer cranks give you more leverage, while shorter cranks allow you to pedal faster. Cranks are measured from the center of the axle to the center of the pedal hole (L).

170 mm

Printing & Usage Overview

A bike length chart is often misunderstood as a complex and confusing tool, but it's actually a simple and handy reference for any cyclist. Many riders assume it's an exact science, but the truth is, these charts are versatile and offer a range of options. While it's a great starting point, the measurements can vary depending on your riding style and preferences. The chart provides a guide, but you can adjust and personalize your bike setup with a few simple checks, like seat height and reach. Understanding the Bike Length Chart The bike length chart is a handy tool for cyclists, offering a simple guide to choosing the right bike size. It's a reference point, helping you find the ideal fit for your height and riding style. This chart is a great starting point, but it's important to remember that it's not an exact science; there are other factors to consider too. Comparing Bike Size Options Bike size charts
