HOW TO MEASURE

A) **Measure around the widest part of your calf**

B) **In bare feet measure from the floor/behind heel to the rear crease of your knee**

C) **Measure around your ankle**

- **The boots have around 3-4cm (1 1/2") stretch;** the calf dimension is the unstretched width.
- Please remember that your **boots will drop approx 3cm (1 1/2")** when worn in. Height on chart is pre-drop height.
- Heel raisers are available to purchase if you are of a slightly shorter leg length; these will help stop the boot pinching at the back whilst wearing in.
